Notice of Hearing and Request for Comments on a Technical Documentation Strategy

AGENCY: Patent and Trademark Office, Commerce

ACTION: Notice of a hearing and request for public comments

SUMMARY: The Patent and Trademark Office (PTO) will hold a public hearing and is seeking written comments to obtain views of the public on the effort of the PTO to make technical documentation accessible to patent examiners and the public while adhering to certain constraints on financial and personnel resources. Interested members of the public are invited to testify at a public hearing and to present written comments on the topics outlined in this notice or on any aspect of this effort.

DATES: A public hearing will be held at 9:00 a.m. on Friday, May 31, 1996.

Requests to present oral testimony at the public hearing should be received on or before May 30, 1996.

Any written comments by those persons offering testimony at the hearings and related to that testimony should be submitted on or before May 30, 1996.

Other written comments will be accepted until June 7, 1996.

ADDRESSES: The hearing will be held in the Commissioner's Conference Room (Room 912), Crystal Park Two, 2121 Crystal Drive, Arlington, Virginia.

Persons wishing to speak at the hearings must notify Mr. Lee Schroeder, in writing marked to his attention at Commissioner of Patents and Trademarks, Box 4, Washington, DC 20231, or by telephone (703) 305-9300 or by telefax at (703) 305-8885, in order to be placed on a list of speakers for the hearing.

Persons wishing to offer written comments should address those comments to the Commissioner of Patents and Trademarks, Box 4, Patent and Trademark Office, Washington, DC 20231, marked to the attention of Mr. Lee Schroeder.

Written comments and transcripts of the hearing will be available for public inspection in Room 902 of Crystal Park Two, at 2121 Crystal Drive, Arlington, Virginia.

FOR FURTHER INFORMATION CONTACT: Mr. Lee Schroeder by telephone at (703) 305-9300, by telefax at (703) 305-8885 or by mail marked to his attention and addressed to Commissioner of Patents and Trademarks, Box 4, Patent and Trademark Office, Washington, DC 20231.

SUPPLEMENTARY INFORMATION:

1. Background

The PTO currently makes technical documentation (foreign and domestic patent and non-patent literature in many forms) available to persons within the PTO for use in the patent examination process. Much of the documentation is accessible through use of the United States Patent Classification System (USPCS). The same documentation is made available to members of the public for use as a source of technical information or for other patent-related uses.

To better use the limited financial and personnel resources available to the PTO, certain changes have been made in the documentation area. Less emphasis is being placed on the continuing reclassification of the documentation in the USPCS and the classification of new foreign patent copies and more reliance is being placed on the classification efforts of other countries and the use of more sophisticated electronic search tools.

To be more specific, the PTO is placing increased reliance on the many commercial data bases of technical information as well as data bases maintained by the PTO. These data bases cover foreign and domestic patent and non-patent literature. The PTO is also placing increased reliance on the classifying, abstracting and summarizing efforts of documentation by both domestic and foreign private entities and also by foreign government or intergovernmental entities. Consequently, less reliance is being placed on the reclassification effort within the PTO. Also, the PTO no longer classifies new foreign patents in the USPCS.

The public's views are sought on the increased reliance on the work of others in the classifying, abstracting and summarizing of documentation and less reliance on the USPCS and classification efforts of persons within the PTO. Public views are also sought on the increased reliance on computerized searching aids, be they full text data bases or data bases of abstracted material, classified or not. Public views are also sought on placing increased reliance on data bases and other sources to at least identify such documents after which a full-text copy of the document could be obtained.

Written comments may be offered on the questions posed below. Comments will also be accepted on any other aspects of the approach of the PTO to make technical information available both to patent examiners and the public.

2. Questions for the Hearing

The public hearing will be held to receive comments on the following specific questions:

A. Are the classification efforts of others (using systems or data bases of classification different from the United States Patent Classification System) able to replace, or partially replace the United States Patent Classification System?

B. Are the public users of the classified technical information systems of the Patent and Trademark Office willing to contribute, or contribute more, toward the ever increasing costs of maintaining these systems?

C. Since the usefulness of automated search tools is affected by the characteristics of the technology being searched, should the Patent and Trademark Office tailor the search system by technology rather than maintaining the USPCS for all technologies?

D. Since it is known that different search tools and techniques lead to different search results (e.g., different results from text or structure search vs. classified image search), are automated assisted searches acceptable if there is an overall improvement in the quality of the patentability search?

E. Advances contemplated in future search systems permit the examiner to add value to the data base while conducting a search by adding or changing classifications for a document, inserting markers and notes on a document, adding documents, etc. This value-added capability leads to search files that exist only in electronic form and which are constantly being upgraded.

1. Does the public need access to the examiner's search file?
2. For post-prosecution/litigation purposes, does the public need to know what is in the examiner's search file at the time the examiner made the search?

F. How should the Patent and Trademark Office approach the issue of classification and retrieval of prior art in view of the current state of the art in the electronic document search and retrieval area, and expected developments in this area, including fully paperless patent and non-patent data bases?

Commissioner of Patents and Trademarks

Reference Collections of U.S. Patents and Trademarks Available for Public Use in Patent and Trademark Depository Libraries

The following libraries, designated as Patent and Trademark Depository Libraries (PTDLs), receive patent and trademark information in various formats from the U.S. Patent and Trademark Office. Many PTDLs have on file all full-text patents issued since 1790, trademarks published since 1872, and select collections of foreign patents. All PTDLs have both the patent and trademark sections of the *Official Gazette of the U.S. Patent and Trademark Office*. The full-text utility and design patents are distributed numerically on 16 mm microfilm, and plant patents on color microfiche. Patent and trademark search systems on CD-ROM (Compact Disc-Read Only) format are available at all PTDLs to increase utilization of and enhance access to the information found in patents and trademarks. It is through the CD-ROM systems that preliminary patent and trademark searches can be conducted through the numerically arranged collections.

All information is available for use by the public free of charge.

In addition, each PTDL offers reference publications which outline and provide access to the patent and trademark classification systems, as well as other documents and publications which supplement the basic search tools. PTDLs provide technical staff assistance in using all materials. Facilities for making paper copies of patent and trademark information are generally provided for a fee.

Since there are variations in the scope of patent and trademark collections among the PTDLs, and their hours of service to the public vary, anyone contemplating use of these collections at a particular library is urged to contact that library in advance about its collections, services, and hours in order to avert possible inconvenience.

*A communication from the examiner should have been received in most applications filed prior to this date.

Patents will Expire as Follows:

(1) The term of any utility or plant patent that is in force on or results from an application filed before June 8, 1995 is the greater of the 20 year term provided in 35 U.S.C. 154(a)(2) or 17 years from grant subject to any terminal disclaimers. 35 U.S.C. 154(c)(1).

(2) All utility and plant patents granted on applications having an actual United States filing date on or after June 8, 1995 are granted for a term which begins on the date on which the patent is granted and ends 20 years from the date on which the application was filed in the United States. If the application contains a specific reference to an earlier application under 35 U.S.C. 120, 121 or 365(c), the patent term ends twenty years from that date on which the earliest application was filed. 35 U.S.C. 154(a)(2).

(3) All design patents are granted for a term of 14 years from the date of the grant.

However, the term of any patent may have been curtailed by disclaimer under the provisions of 35 U.S.C. 153, have lapsed due to failure to pay maintenance fees, or have been extended under the provisions of 35 U.S.C. 154, 155, or 156. Thus, if more reliable information is needed with respect to a particular patent, then the specific patent file should be reviewed to determine the actual date of patent expiration.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
